

IT Consulting

LogicForce provides IT solutions tailored for the legal environment. We specialize in customizing an IT system and support plan to meet the needs of each individual firm.

IT Assessments

An IT Assessment from the professional team of LogicForce consultants is a good first step in modernizing your firm's technology resources. Our assessment team will visit your firm to analyze your current IT infrastructure, interview key technology decision makers, and ascertain the firm's short and long-range technology goals. We will then follow up with a comprehensive assessment report that includes a step-by-step technology upgrade plan complete with budgeting and implementation details.

Network Installation

Whether your firm needs incremental upgrades or a complete technology overhaul, including updated network servers, efficient workstations, and the latest legal specific software applications, LogicForce is a one-stop shop for your IT solution. Our clients call on us to order, install, configure, and support the hardware and software components that make up their network systems. Our business is technology. Our clients provide legal services. We strive for excellence in our field, so that our clients can do the same.

Managed Network Maintenance

Maintaining a trouble-free and efficient network at your firm is our number one priority. We feel that our clients are at an advantage by focusing 100% of their attention on their business and not wrestling with thorny IT issues. We take the initiative to maintain a sound networking environment at your firm. From anti-virus measures to the implementation of the latest patches for your systems, we stay on top of the actions that need to be taken to keep your network operating smoothly.

Help Desk Support

Whether we are assisting an attorney access data resources remotely, answering "how do I...?" questions from a legal assistant, or helping a paralegal automate a laborious task, no IT problem or issue is too small or too large for us to address. LogicForce technology consultants stand ready to assist via phone, remote connection, or in person. Our goal is to minimize the distance between you and the solution to your IT problem.
